Mechs, but equally capable of repairs on damaged armor, the JI100 is the repair and salvage vehicle on the field. Johnston Industries of New Syrtis, Inc. The JI100 uses three sophisticated, fully automated systems complete with a variety of cutting edge tools to allow its technical crew to perform repairs on parts carried into the field. The JI100 is not and lightly armed, the JI100 is not in a combat role, and is often kept well behind the front line. The changing face of war has increasingly put at risk these valuable machines in combat with tanks and tanks. With this in mind, Wade Industries JI100, nicknamed "The Coffin," with its limited of its meager firepower and some of its limited.

Savoni is the only name this petite, fiery tank commander of the Highlanders' Republican Guards will answer to, and for that reason—as well as her lack of social graces outside military life—many jump to the conclusion that she actually hails from Clan origins. In truth, Savoni is a native of Outreach, and was virtually raised by the violent street gangs that regularly roam the devastated wasteland that once was a prosperous center for the mercenary trade across the Inner Sphere.

A detailed black and white illustration of a futuristic, heavily armored military vehicle, possibly a tank or armored car. The vehicle is shown from a side profile, facing left. It features a large, complex turret mounted on top, which houses a long-barreled main gun and various sensors and antennas. The hull is covered in intricate armor plating, including a large circular sensor or light on the front. The vehicle has a low, compact profile with a small rear section. The entire illustration is set against a plain white background and is enclosed within a thick black rectangular border.

Power Plant:
Fusion Type 80

Cruising Speed: 76 kph

Maximum Speed: 119 kph

Armor: Forging HTT05
with CASE
